Member Comments:

This was a 2-part job. On June 11, a team of three was sent to complete masonry work in basement. Two men prepared wall as one man mixed cement. Crew consulted boss before anything prep work took place. They discussed dampness that I was experiencing, and explained steps to rectify problem. They removed debris, prepped walls and prepared space for part-two (removal of steps). On June 12, carpenters built a new steps w/railing. Carpenter removed 1/3 of a beam that was too low, and supported the section removed with new materials. Voila! Now I no longer have to worry about hitting my head.
