They did a great job on our kitchen remodel. Make sure you ask for Barry because him and his team did such a great job. I put out several quotes for a kitchen remodel and they had the best price. But I decided to go with them not because of price more the fact that they knew what they were talking about, how to avoid problems and the fact that he has access to a large crew so he was able to schedule the job at whatever date worked for me and get the project done. I was able to text him at night and he would work with my wife and make sure all her concerns were met. How often can you text your contractor at 12am and he responds with a positive answer. I will definitely call them for my next project.
