HOME HEATING EQUIPMENT REBATE PROGRAM

Welcome to the Pennsylvania Home Heating Equipment Rebate Program!

Almost half of your home energy consumption goes toward heating and water heating — more than any other appliance or fixture. That's why Pennsylvania is offering an incentive for you to upgrade your heating equipment for energy cost savings.

Starting April 21, 2010, residents of Pennsylvania will be eligible to receive rebates for the purchase of qualifying high efficiency home heating equipment. Qualifying products will be non-electric ENERGY STAR-qualified water heaters, furnaces, and boilers.

Funded by the 2009 American Recovery and Reinvestment Act (ARRA), the Pennsylvania Home Heating Equipment Rebate Program offers rebates to Pennsylvania residents in existing single-family homes to encourage energy efficient product purchases and save energy throughout the state.

The Pennsylvania Home Heating Equipment Rebate program offers rebates only for heating equipment. If you are looking for appliance rebates such as clothes washers, dishwashers, refrigerators, etc., please visit [Tax Credits & Other Incentives](#) for more information. **Watt Watchers inquiries should be routed to the [Allegheny Power programs website](#).**

Looking for a qualifying gas storage water heater? Qualifying models are available, but may be special order items. Some contractors carry qualifying models in stock, or you may need to work with your contractor or retailer to order one. Please review the [Frequently Asked Questions](#) and [Qualifying Product List](#) for more detail.

Program Eligibility

- Rebates are available only for Pennsylvania residents who live in single-family homes for the replacement of existing, operational equipment. Installations in multi-family or new construction buildings do not qualify
- Reservations are required in order to receive a rebate; it is recommended that customers obtain a reservation prior to purchase to guarantee rebate availability
- Only products that meet energy efficiency specifications qualify (see the [Qualifying Products](#) page for more information)
- Qualifying products must be purchased on or after April 21, 2010. Purchases before that date do not qualify for rebates
- Only one product per category per household address
- Purchases must be within Pennsylvania and equipment must be installed by a state-registered contractor. Please see the [Pennsylvania Attorney General web site](#) for a list of registered contractors
- Contractors or other third parties are not eligible to receive rebates
- Recycling of existing equipment is encouraged, otherwise disposal must be in compliance with state waste management requirements (see the [Recycling & Links](#) page for more information)
- Customers may not claim rebates from both statewide program and electric utility rebate programs
